(a) Adaptation-induced degradation
Raw building–seed event rate (%)
Target adaptation budget (days; discrete conditions)
F1
F2
(b) Temporal baseline underperformance
Raw building–seed event rate (%)
Target adaptation budget (days; discrete conditions)
F3-PD
F3-W
F3-both
(c) Seed-dependent directional instability
Buildings with F4 (%)
Target adaptation budget (days; discrete conditions)
F4
F4: improving and degrading seeds
within the same building and budget
